DESCRIPTIONS OF DIFFERENT SPECIALIST TREATMENTS

Lithos Therapy

Lithos Therapy is based on thermotherapy and cryotherapy techniques. During a full body Lithos Massage heated and chilled rocks are placed over your entire body and used as massage instruments.

The use of both heated and chilled rocks enable the therapist to achieve a deeper and more relaxing massage than would otherwise be possible. This provides a wonderful enhancement to any massage you might normally have experienced.

The heated rocks prepare the body for a more effective massage that helps to melt away muscle aches and pains, sore joints and neck problems, particularly suited to sports lover and people on the go.

The simultaneous use of heated and chilled rocks helps to detoxify the lymph system and will provide stimulation for your circulatory system.

Lithos treatments are doubly beneficial in that they are incredibly relaxing but they also work to lift our overall feeling of wellbeing.

Aromatherapy

Working with the finest Essential oils from London to completely work on all your senses, we offer a full selection of blended oils to choose from.

Essential oils are beneficial to many stress related problems, insomnia, exhaustion, poor skin condition and other similar problems. An aromatherapy massage treatment allows the oils to gently absorb into our system releasing the soothing effects of the selected oil, you will soon discover just why aromatherapy is proving to be so popular.

Aromatherapy is such a totally relaxing experience that we would recommend that you allow a little relaxation time to be spent in our day room to 'return to earth'.

Pregnancy Aromatherapy

Using carefully selected blended oils this treatment is designed specifically to help to relax and nurture our expectant mothers.

Our massage movements are designed for comfort so that nothing is left out of the pampering she deserves during her pregnancy.

Reflexology

Reflexology is based on the premise that different areas of the feet reflect different parts of the body.

Foot massage provides an overall tonic that will entirely relax you.

Reflexology also increases the blood flow, which promotes increased energy flow; this is excellent for maintaining good health.

Relaxing your body promotes a feeling of strength and vitality to cope with the daily rigours of life.

Reiki

Reiki, which means 'universal energy' is taken from an ancient form of Japanese healing that opens the energy channels of the body. Our modern day therapists are able to ease physical and emotional problems. During a healing session the trained Reiki practitioner will hold their hands above the client being treated to act as a channel for energy.
